

Vision

The global financial sector is ready for change. Financial products and markets stayed the same in many aspects for many centuries, developing and maintaining industry of intermediaries became the business worth trillions of dollars with one single aim, to maintain the exchange of financial assets between sellers and buyers.

In near future the next development stage of financial market will be marked with erasure of financial boundaries, reduction of the time and operational difficulties as well as expenses and intermediaries while working with money and assets. The absolute new environment without any geographical boundaries is being formed for people, managers of assets, banks, commercial companies and other market participants.

PlanEx Platform

PlanEx is poised to drastically improve how financial assets are bought, managed, and sold. Using blockchain, PlanEx can dis-intermediate dozens of trillion dollar industries.

Complex, multi-step transfers of assets are accomplished in a single transaction that is recorded, auditable, and immutable from the moment it takes place. PlanEx, an ecosystem, where financial assets and crypto assets, meet hedge funds. PlanEx provides an income level of top algorithmic hedge funds to anyone who has a smartphone or a computer, replacing traditional saving accounts

We combine financial and cryptocurrency assets on one single platform. Creating an exchange out of traditional financial and crypto assets, with real tokenization and bilateral conversion.

-  PlanEx ranking among **the top three leading project** in the Global Blockchain Summit 2018 from 42 projects total
-  The team successfully **implemented 5 blockchain projects**
-  **Broad support** for financial and crypto communities
